2. Install Instructions

1. Unzip the file once it is done downloading into a folder called "422-EasyA".
2. Open the terminal on your computer (Powershell/CMD on Windows, Terminal on Mac).
3. Navigate to the directory where the file was downloaded to. In most cases, this can be done by typing "cd Downloads/422-EasyA" in the terminal and pressing enter unless the directory was changed. If the file is in a different directory type "cd <directory path>/422-EasyA/".
4. To replace the included data and faculty list, type and run "python3 addData.py." The program will guide you through updating the data. See section 4 of the user documentation for more info on file format requirements.
5. To run the program, type "python3 EasyA.py" in the same directory and the program will start.
